Air Guitar, Precision Mode and Performance Mode can be toggled on and off from the Cheats menu. You can also change between five different levels of Hyperspeed at this menu.

### UNLOCK EVERYTHING

Select Cheats from the Options. Choose Enter Cheat and enter the following (no sounds play while this code is entered):

Green + Red + Blue + Orange
Green + Red + Yellow + Blue
Green + Red + Yellow + Orange
Green + Yellow + Blue + Orange
Green + Red + Yellow + Blue

Green + Red + Yellow + Blue
Green + Yellow + Blue + Orange
Green + Red + Yellow + Blue
Green + Red + Yellow + Orange

An easier way to illustrate this code is to represent Green as 1, progressing down the guitar neck to Orange as 5. For example, if you have 1345, you would hold Green + Yellow + Blue + Orange while strumming: 1245 + 1234 + 1235 + 1345 + 1234 + 2345 + 1234 + 1345 + 1234 + 1235 + 1235 + 1234 + 1235.

### CARD INPUT SYSTEM

When the Upsilon Cube is unearthed and shown to Aldous, the Card Input System feature becomes available. This will allow you to input data from Spectrobe Cards. These give you new Spectrobes and Custom Parts. If you get your hands on a Spectrobe Card and the system is unlocked, investigate the card input system in the spaceship's lower deck.

Follow the instructions on the upper screen to match the four corner points of the card to the corners of the touch screen. Touch the screen through the seven holes in the card in the order indicated on the card. If the code you input is correct, you receive Spectrobes, custom Parts, minerals or Cubes.

You can input the same card a maximum of four times. This means that you can only obtain four of the same Spectrobes from a single card. You can only input cards once. And some cards cannot be input until you have reached a certain point in the game.

The following table gives you a seven character code which refers to the spots you touch in order. The first four characters have you touching the four corners and the final three are spots among the 12 in the middle. To get Cyclone Geo, Hammer Geo, Ice Geo, Plasma Geo, or Thunder Geo, you must first beat the game.

# ONLINE GAMING FOR KIDS: A PARENT'S GUIDE

There are plenty of great games for kids on the web, but which ones are best for your child, and how can you ensure they don't visit a site that's inappropriate? Well, we've compiled a list of the most impressive and trusted gaming spots for kids, then categorized them by age. Visit these sites and choose which ones your family likes most. Once you've determined your favorites, you can then make accessing them safe and easy for your child in just three easy steps:

## SAFE ONLINE GAMING FOR KIDS IS AS EASY AS 1-2-3

Here's how you can create an **Internet Games Page**—a clickable document that allows your child to safely and easily visit your family's favorite online gaming sites for kids:

1. Open a new document in Microsoft Word.
2. Type in the URLs (web site addresses) listed in this section that best suit your child's age and interests. After each URL, press ENTER to automatically create a Hyperlink. The address will then appear in blue, underlined text. That means you can now immediately go directly to that web site. Just simultaneously press CTRL and click on the blue text. See our note below for an even slicker way of doing this.
3. When your list of Hyperlinks is complete, save the file as "[Your Child's Name]'s Games" on your computer's desktop.

## USER FRIENDLY LINKS

If you think your child might find it difficult to visit his or her favorite gaming sites by selecting from a list of long and sometimes unwieldy internet addresses, then customize the lists on your Internet Games Page by renaming them with something more easily recognizable. It's easy. Simply type the name you wish to use (LEGO, for example) and highlight the word with your mouse. Next, right-click on the highlighted word and select Hyperlink from the window that pops up. Another window appears with your cursor blinking in the empty Address field. Type in the proper URL here (in the case of LEGO, you would type <http://play.lego.com/en-US/games/default.aspx> into this field), then click OK. The word you highlighted on your Internet Games Page is now a Hyperlink. Using our example, that means your child can simply click on (left-click + CTRL) the word "LEGO" to visit the LEGO games site!

You can even dress up this document with colorful backgrounds and clip art to make it even more personal and appealing. You now have a resource that provides a quick and easy path for your child to access safe and entertaining gaming sites that you have seen and trust.

# BEST ONLINE GAMING SITES FOR KIDS

## AGES 6-7

Children in this age group may not be as computer savvy and certainly won't have as strong reading skills as older kids. So, you may need to get your child started until he or she is comfortable navigating these sites and properly understands the rules to the games.

We've put these games in a separate category because they're not free. They either require a subscription or the purchase of a toy to play. However, you may consider these investments worthwhile, as they do provide some intriguing gameplay and learning opportunities. Plus, if your kids are into gaming or have friends who are, they're bound to mention these sites to you sooner or later, so you may want to see what they're all about for yourself.
